2. The tradable portfolio

As regards the Fund's asset breakdown, cash holds the dominant position which accounts for 49%, i.e. 35% of the total assets.

The large weighting of cash is due to the fact that we see the Bucharest Stock Exchange as being exposed to the risk of corrections due to its ongoing growth, while the companies' economic performance did not keep up the pace.

The above chart shows the 3-year return of the BET index. In the last three years it went up by 100% and similar high values of that index overlapped with market's all time highs.
